QUALITY

Quality Control in our Fields & farms

After the selection of the right varieties and seeds in our farms, our in-house cultivation department is in charge for the entire follow-up of the growth and safety of the crops, it includes the use of fertilizers and pesticides which are our utmost priority.

Quality Control in Production

After harvest, processing is done using the highest techniques to insure best flavor and maximum nutritional value. For this reason we have the most qualified production team to insure that our targets are met.

Quality control during loading & preparing for shipping

The perfect control systems are in use, to make it possible to assure the perfect quality until reach final step as a packed final products ready for shipping , also we accept inspection companies like SGS & ITS to check the quality during loading.
