# 01

## Anhydrous Sodium Sulphate

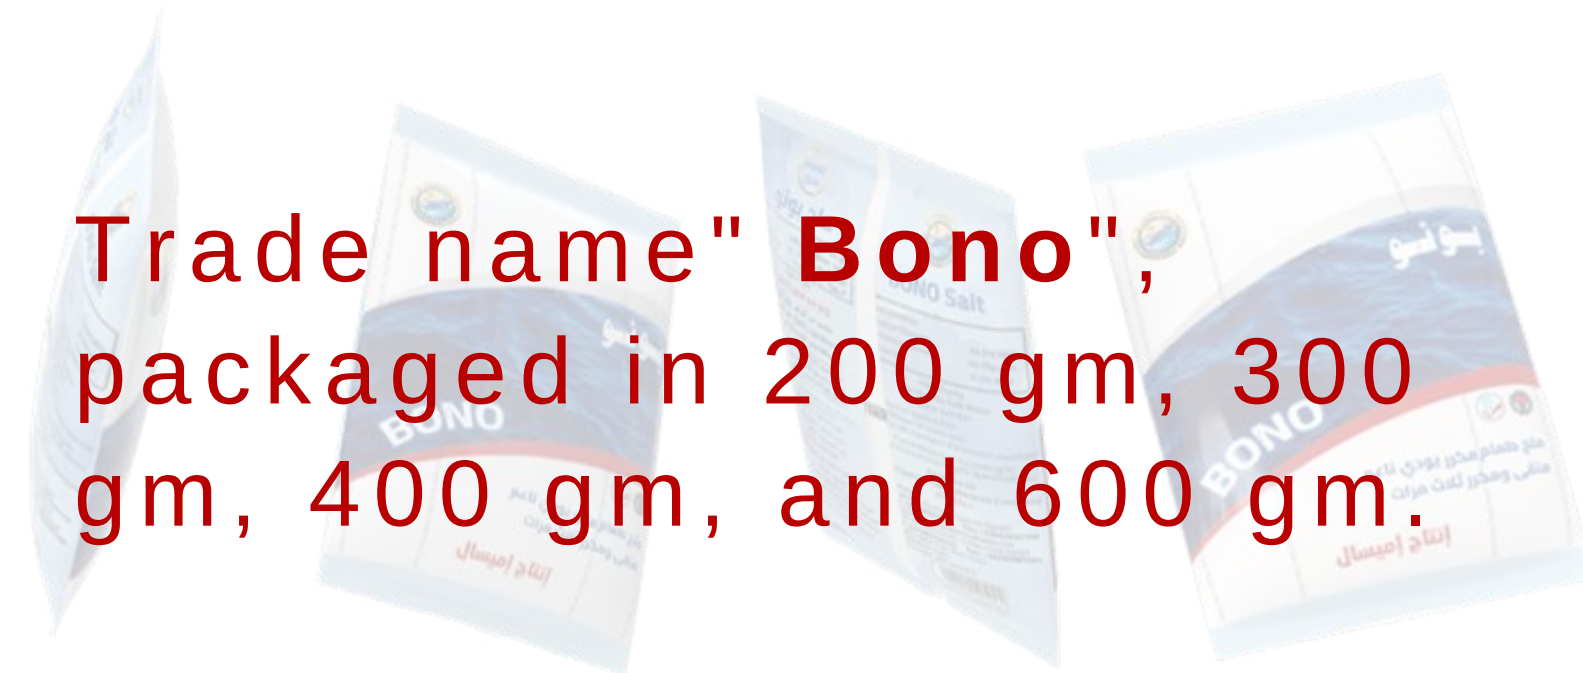

The company produces Sodium Sulphate salt with a production capacity of 120 thousand tons annually that feeds the dry detergent industry, the glass, paper pulp and dyeing industry of the fabric .

Demand is increasing locally and internationally for Anhydrous Sodium Sulphate , our production covered the local market in addition to export to many Arab and European countries.

Trade name" **Bono**",  
packaged in 200 gm, 300  
gm, 400 gm, and 600 gm.

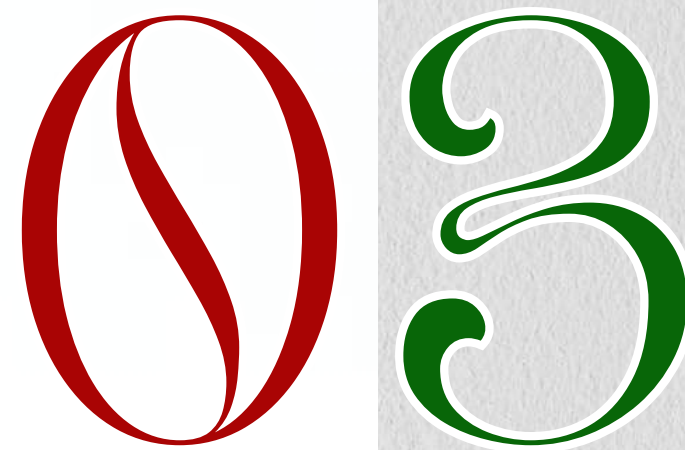

02

Human sodium  
chloride salt

# Sodium Chloride salt

For dyeing, textile, dairy and food industry.

## Facilitates the following:

- Transfer of dyeing materials to the surface of the fabric.
- Absorption of the dye on the outside of the tissue.
- The dye penetrates into the textile fibers.
- Complete exhaustion of the amount of dye used.
- Save time consumed in preparing the saline solution.

It is used as a fertilizer to help the growth of seeds and root systems, increase chlorophyll, and improve the absorption of some nutrients.

04

# Hydro- magnesium sulfate:

# 05

## High-purity sodium chloride salt (vacuum)

It is produced as an essential material in the dairy and food industry, as well as in the manufacture of sodium carbonate, caustic soda, chlorine gas, and textiles.

The company also produces spray bottles of 250 gm, 750 gm, and low-sodium salt for high blood pressure patients.

# Tablet salt

It is produced according to the latest international specifications and is used in the process of activating the resin used to remove water hardness in industrial companies, steam and electricity generation plants, major hotels, and in home uses of dishwashing machines.

used in dialysis solutions,  
blood filtration solutions, and  
peritoneal dialysis solutions.

High-purity  
sodium  
chloride salt

It is used as a raw material in intravenous doses, blood filtration solutions, peritoneal dialysis solutions. , and other pharmaceutical uses.

08

Pharmaceutical  
grade salt

# Potassium Sulphate Fertilizer

**Potassium Sulphate Fertilizer is a high-purity, fully water-soluble agricultural fertilizer that supplies plants with essential potassium and sulfur nutrients. It enhances the uptake of other nutrients, supports key physiological processes in plants, and improves fruit quality in terms of size, color, and taste.**
